SUMMARY

B.Sc. Infotronics Systems Engineering student at Hochschule Rhein-Waal with practical experience in software testing and technical project work. Through my Werkstudent role at Creomnia, I have gained experience with real working industrial environment, checking workflow behavior, reporting issues, and working closely with developers. My studies have given me a strong base in software engineering, computer networks, distributed systems and system design. Alongside university, I continue to build full stack development experience through self learning and personal projects. I am looking for a working student or internship role where I can contribute to a development or QA team, learn from real projects, and grow further in software development.

EXPERIENCE

Quality Assurance Engineer (Werkstudent), Remote

03/2026 – Present

Creomnia GmbH

creomnia.com

- Perform end-to-end execution of automation flows, AI agents, API tests, workflow automation, extensions
- Validate codes behavior JavaScript and Python code execution across normal cases, edge cases, optimization
- Analyze platform behavior using testing tools i.e; Postman, NoSql Database, Chrome DevTools, browser logs to identify technical issues
- Testing documentation, assistance to developers through test, debugging, bug investing, QA feedback

Hotel Audit Executive

06/2024 – Present

HSDC GmbH

Köln, Germany

- Manage daily hotel audit operations, including end-of-day closure, revenue checks, reports, and billing control
- Support IT-related tasks, system checks, and operational issue handling
- Prepare reports, maintain Excel records, and track audit data for management review
- Front desk support in German and English

EDUCATION

Hochschule Rhein-Waal University of Applied Sciences

09/2022 – Present

B.Sc Infotronics System Engineering

Kamp-Lintfort, Germany

- Software Engineering, Computer Networks, Distributed Systems, Computer Architecture

Saint Patrick's High School

08/2018 – 08/2020

A levels - Advanced Mathematics, Physics

Karachi, Pakistan

PROJECTS

Distributed Housing Platform Microservices

- Microservices based housing application with Django, Restful API, modular services, scalable distributed design
- Collaborative development using Git version control, branch management, pull requests, and merge workflows
- Agile based task planning, iterative feature development, debugging, and system integration in a team environment

Real-Time Multiplayer Game

- Developed a LAN based multiplayer vocabulary testing game using Java, Swing, and socket programming
- Interactive GUI components for user input, scoring, and game-play logic
- Object oriented programming principles for modular game structure and maintainability

Numerical Methods Simulation in Python

- Visual simulations of numerical roots findings methods, NumPy and SciPy for scientific computation and numerical analysis

SKILLS

Full-stack development, HTML, CSS, Tailwind, JavaScript, Node.js, Java - Object Oriented Programming OOP, Django Rest Framework, Restful API, Postman, AI-Agents, Workflow Automations, SaaS, Cloud services, AWS, Docker, Linux, Git, GitHub, CI/CD, Distributed Systems, Testing, Debugging, Chrome DevTools, Quality Assurance, Testing, Jira, Agile Methodology, SCRUM, Eclipse, VS Code, Teamwork, Collaboration

CERTIFICATIONS

Full-stack Web Development	2026
<i>Udemy</i>	Online
HTML, CSS, Tailwind, JavaScript, Node.js, MongoDB, Database, Web Development, Hands-on practice, Projects	
Cloud Computing AZ-900	2024
<i>Re DI School of Digital Integration</i>	Germany
Cloud concepts, management, architectures and services, labs and governance	
Python Programming	2023
<i>Udemy</i>	Online
Beginner to intermediate Python programming skills, core syntax, OOP, and problem solving	

LANGUAGES

English Advanced C1
German Upper intermediate B2
